BECAUSE REPETITION IS THE MOTHER OF ALL KNOWLEDGE

In this edition

1. INTRODUCTION
2. DON'T LET KNOWLEDGE FADE AWAY
3. WORKING SAFELY AND INCREASING JOB SATISFACTION
4. HOW DOES IT WORK?
5. ALWAYS AND EVERYWHERE

SAFE
SUPPORTING
& READY
TO USE!

More and more Contractors join HSElife. The Premium package gives their staff access to the full range of HSElife materials, including HSElife Academy.

Such as necessary training, the use of 22 HSE items, participating in industry campaigns and much, much more.

The latest feature include an option for Contractors' staff to sign-up to the HSElife Academy.

It is highly recommended for staff involved in the Permit to Work process, but all Contractor's staff can use it freely. In the special newsletter we summarise what the HSElife Academy is all about.

THE PROBLEM

**IF KNOWLEDGE
FADES AWAY,
THE DANGER LIES AHEAD!**

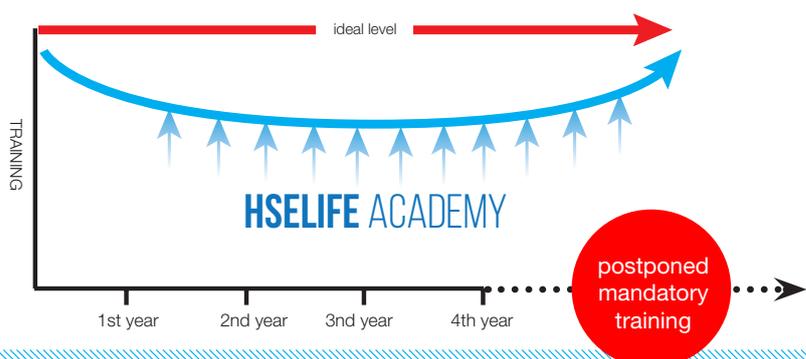

HOW CAN WE STOP THIS?

DON'T LET KNOWLEDGE FADE AWAY!

Do you always have the necessary expertise in your mind?
Probably not, and that's **not surprising**.

The knowledge you gain during educational programmes and training courses fades rapidly. **The HSElife Academy will help you to continuously keep your knowledge at the right level, up-to-date and top of mind.** In practice, this benefits you directly. You act correctly and reduce the risk of incidents.

**BECOME PART OF
A WINNING TEAM
THANKS TO THE
HSELIFE ACADEMY!**

WORKING SAFELY AND INCREASING JOB SATISFACTION

HSE LIFE
Academy

The HSElife Academy system will help you to always keep your knowledge up-to-date and top of mind.

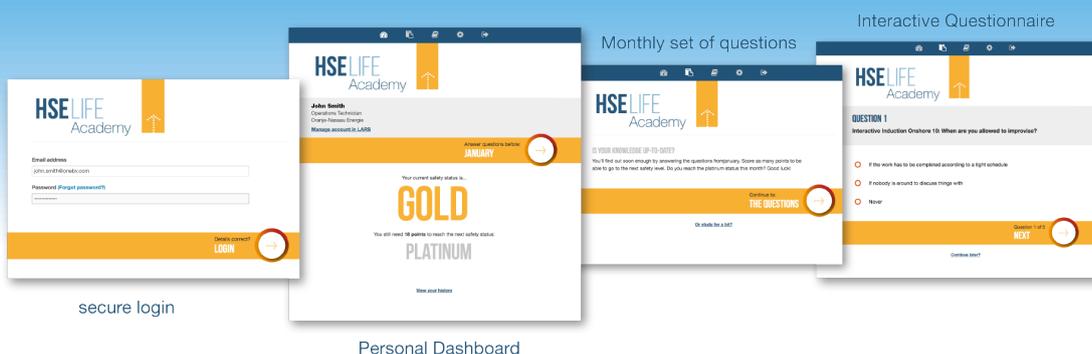

The Academy is easy to use and available anytime, anywhere. It complements any annual educational programmes and training courses you are taking. It helps you and your colleagues to act correctly and reduce the risk of mistakes. And let's face it, when work activities run smoothly, it is a lot more enjoyable too, isn't it?

HOW DOES IT WORK?

By participating in the HSElife Academy you can get more out of your work. This can be done by applying gained knowledge in your work and having the knowledge at the required level.

The HSElife Academy supports your efforts in this regard. The Academy encourages you to maintain your expertise by asking five challenging safety questions each month, plus two bonus questions where necessary. These questions can be about your work itself, or about the associated rules, guidelines and the corporate culture. **In other words, the things you encounter each day.**

IMPORTANT TO KNOW: Your Safety Ranking will be registered in HSElife Learning and Registration System (LARS). Upon request, this information - together with details of your training results- can be sent to your Company CMS via the HSElife LARS API.

ALWAYS AND EVERYWHERE

The great thing about the HSElife Academy is that it is extremely user friendly and contains all the information you need. For instance, it takes only a few moments of your time to answer the safety questions involved. You can answer these questions whenever it suits you, because the Academy is available anytime, anywhere, on any mobile device or computer.

When you have answered the questions, you get to see the results immediately. If you do well, you will get a higher safety ranking. Each result is automatically recorded in the registration system. This gives you direct insight into your safety ranking. Do you want to excel and be part of a winning team? If so, then **go for the best result!**

REMINDERS

When new sets of questions become available, the HSElife Academy system will notify you immediately, by email. What if you haven't managed to answer the questions yet, or if it has simply slipped your mind? No problem. The Academy will help you by sending a reminder after two weeks.

5 QUESTIONS TO ANSWER EVERY MONTH

Every month you will be sent five questions that you must answer if you want to maintain or improve your knowledge level. The correct answers can be found for instance on the HSElife website. If you make a mistake, you will get two bonus questions.

PLATINUM!

Make a difference and go for platinum!

By actively maintaining and developing your knowledge and skills, you can make a real difference. In addition, if you have a platinum safety ranking, then many organizations **will be keen to welcome you!**
